Description

7 Year 450,000KM Green Coolant is a **GENUINE GLYSANTIN G48**, Original Equipment Manufacturer (OEM), **Fully Licensed and Warranty Approved**, Type "A" Ethylene glycol, Anti-Freeze Anti-Boil as used in initial manufacturer factory fills. It uses a technically advanced **HYBRID** (HOAT - Hybrid Organic Acid Technology) based inhibitor system that is **Phosphate, Amine and Nitrite free**. The extended long life inhibitor formulation prevents rust, corrosion, cavitation and degradation of the cooling system. It is available in both concentrate and premix formulations.

Application

7 Year 450,000KM Green Coolant is suitable for the cooling systems of petrol, LPG, light and heavy duty diesel and industrial engines where Hybrid (HOAT) type anti-freeze / anti-boil and anti-corrosion properties are required.

7 Year 450,000KM Green Coolant is suitable for passenger cars, 4WD's, motorcycles, light & heavy duty commercial vehicles, construction and agricultural equipment. It is especially suited to vehicles of European origin such as Audi / VW (G11), BMW, Mercedes, Porsche (Pre-1995), Volvo, Opel & Saab, but it may be used in all types of vehicles.

7 Year 450,000KM Green Coolant provides long-term protection against rust and corrosion for all materials used in the engine and in the cooling system construction. It protects cast iron, aluminium, copper and solder alloys as well as the hoses, seals and plastics used for the cooling system construction. It is effective in all cast iron aluminium engines that are under load or used in extreme hot and cold climates.

7 Year 450,000KM Green Coolant may be used in all types of vehicles that use green, blue or yellow coloured initial fill coolants and it is also suitable for use in out of warranty service to maintain OEM performance. It is also ideal for motorcycles.

7 Year 450,000KM Green Coolant Premix is a 50% concentration formulation and is ready to use directly from the container. It is pre-mixed with de-mineralised water and can be poured directly into the cooling system. No further dilution is required. It can be used as a complete service refill, top up or is safe to mix with compatible Type A coolant. Penrite recommend that a 50% concentration level should be maintained for maximum, performance and longevity of the coolant and protection of the cooling system.

7 Year 450,000KM Green Coolant Concentrate should be used at a concentration level of 50%. We recommend using de-mineralised water when mixing although the phosphate free formulation allows it to be mixed with normal tap water if necessary.

*Penrite recommend flushing the cooling system prior to a complete service refill. **Penrite Radiator Flush** effectively cleans the system in 7 minutes and prepares the cooling system for new coolant.*

Dose	Freezing Point	Boiling Point
50%	-38°C	109°

PENRITE

Service Interval

When used as indicated and correctly maintained -

Passenger Cars. 4WD, Light Commercials	7 years or 450,000km (whichever comes first)
Heavy Duty On Highway Diesel	7 years or 600,000km (whichever comes first)
Heavy Duty Off Highway Diesel	7 years or 6000 hours (whichever comes first)

Product Benefits

- **7 Year 450,000km** drain intervals if used and maintained at 50%.
- **OEM Approved** to maintain manufacturer's warranty & specifications
- Compatible with plastics, rubbers and seals.
- Protects all internal surfaces from corrosion, including aluminium.
- **Phosphate** free formulation allows use with hard water.
- **Nitrite** and **amine** free.

OEM Approvals

Audi/Bentley/Lamborghini/Seat/Skoda/VW TL 774-C (G11)	German Army TL 6850-0038/1	BMW N 600 69.0

Perkins	Sterling				

Typical Data

Colour	Green
Density at 20°C, kg/L (Concentrate)	1.123
Density at 20°C, kg/L (Premix 50%)	1.073
Glycol Content, g/L (Concentrate)	1064
Glycol Content, g/L (Premix 50%)	532

To ensure you use the correct coolant in your vehicle, refer to the Penrite Recommendation Guide located at www.penriteoil.com or refer to your owner's handbook.

Information in this sheet is based on recent production. Minor variations to typical properties are expected in normal manufacture and do not affect product performance. An MSDS is available on request.
